ITRC TIP: NAVIGATING LONG WEB DOCUMENTS

When you're reading a long Web page, there are several ways to scroll through the page. Some people use the mouse and the browser scroll bars, others use the [Page Down] and [Page Up] keys, and still others use what is called an Intellimouse.

One method people often aren't aware of is the [Spacebar]. Speedy typists prefer to use the [Spacebar] for scrolling down through a lengthy web document. You can keep your fingers positioned on the home row keys [asdf jkl;] and your wrists nestled in the wrist rest. Both Netscape Navigator and Internet Explorer let you scroll down using the [Spacebar]. To scroll back up, the key strokes differ in Netscape and Microsoft's browsers. Navigator uses [Backspace], and Internet Explorer's keystroke is [Shift]+[Spacebar].

Thanks to Bryan Ayers in the Information Technology Response Center for making ITRC Tips available to CITations readers.
