Acknowledgments

The creation of this database was supported in part by the Eunice Kennedy Shriver National Institute of Child Health and Human Development R21 HD095448, National Institute of Health: P2C HD050924, and the Jacobs Foundation Research Fellowship Program 2015-1170-09. We are grateful to Tim Monbureau, Joyce Tabor, Kathleen Mullan Harris, Robert Hummer, Sarah Dean, and Maria Marrufo, in addition to staff from the Add Health project and the Carolina Population Center, in helping us produce this data base.

This research uses data from Add Health, a program project directed by Kathleen Mullan Harris and designed by J. Richard Udry, Peter S. Bearman, and Kathleen Mullan Harris at the University of North Carolina at Chapel Hill, and funded by grant P01-HD31921 from the Eunice Kennedy Shriver National Institute of Child Health and Human Development, with cooperative funding from 23 other federal agencies and foundations. Information on how to obtain the Add Health data files is available on the Add Health website (http://www.cpc.unc.edu/addhealth). No direct support was received from grant P01-HD31921 for this analysis.

Introduction

Wave II Tobacco Tax Data file supplements the County Health and Mobility database available for Waves I & IV. Comprehensively, these data files provide tobacco tax for Add Health respondent state of residence from Wave I to Wave IV.

Data

Tobacco tax information, assembled in Orzechowski and Walker’s annual compendium, is measured at the state level. Data were matched to the state that the Add Health respondent was living in at the time of the Wave II interview. Data were matched to respondents so as to ensure that these contextual variables correspond as closely as possible to the year in which the Add Health respondents were interviewed at Wave II (1996).

Tax Burden on Tobacco

Data come from the Tax Burden on Tobacco dataset.
State level cigarette tax per pack, in dollars (1996) ................................................................. S2CT001

Missing codes

The final digit of the missing codes indicates the reason for which they are missing. The missing code of 8 denotes respondents in Add Health who lack the geocodes necessary for merging respondent locations to the various source data.
